

Method Data Science

The bolt-on innovation team for PE-backed companies.

We identify the proprietary expertise that makes your company valuable, codify it into defensible technical systems, protect the IP, and implement AI that compounds your competitive advantage instead of eroding it.

Three disciplines under one roof

IP Recognition

JD in IP law, patented inventions on the team. We identify what's worth protecting.

Technical Codification

CTO-level leadership in regulated industries. We build defensible systems.

AI Implementation

Hands-on AI/ML engineering. We deploy AI that compounds the moat.

One engagement. Four workstreams.

- **IP & Defensibility Diagnosis** — \$15K–\$25K standalone or Phase 0.
- **Technical Codification (Fractional CTO)** — \$20K–\$30K/month.
- **AI That Compounds** — Fixed-fee or retainer.
- **Software Takeover & Scale** — Fixed-fee Phase 1, then retainer.

Selected engagements

- GoodRx — Healthcare, IP + technical assessment
- The Mather Group — Wealth management, churn prediction + data engineering
- ListReports — Mortgage/real estate SaaS, data engineering + patent-pending IP
- Photopharmics — Clinical/HIPAA, PD ecosystem + physician targeting
